

HTC Series CNC Press Brake 30T-400T Bending Press Brake Machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: genuo
- Minimum Order Quantity: 1
- Price: negotiable
- Packaging Details: carton box
- Payment Terms: L/C, T/T, D/P, D/A

Product Specification

- Product_name: GENUO EASY HTC Series CNC Bending Machines
- Description: GENUO EASY HTC Series CNC Bending Machines Are The Selling Small Sheet Metal Bending Machine Worldwide. Esay Series Press Brakes Adopts Classic Design. The High-strength Frame And Simple Torsion Bar Structure Ensure The Synchronization Of Both Ends Of The
- Features: High-strength Frame, Simple Torsion Bar Structure, Synchronization Of Both Ends, Smooth Operation Of The Ram, Stable Bending Performance, High Quality Hydraulic System, Strong Power And Bending Speed, Digital Control System For Editing Bending Depth And Stopping
- Optional_range: 30T ~ 400T
- Highlight: **400T Bending Press Brake Machine,**
30T Bending Press Brake Machine,
HTC bending brake machine

PRESS BRAKES

EASY HTC (WC67Y) Series

Standard Equipment

- ◆ Estun E21 NC control
- ◆ Back gauge with linear guide and ball screw
- ◆ Ram via double cylinder mechanical positioning
- ◆ European-style punch and Multi-V Dies
- ◆ Fast punch clamps and movable front support
- ◆ SIEMENS main motor, Sunny pump, Rexroth Valve
- ◆ EMB ferrule type pipe connector, NO, K sealing rings
- ◆ 30~400 Tons and 4~20ft Bending Lengths options

Feature

- ◇ X axis and Y axis numerical control
- ◇ Motorized variable frequency drive
- ◇ Depth adjustment for different angles
- ◇ Adapt to sheet metal with different thickness
- ◇ More efficient and variable bending
- ◇ Powerful and durable bending power
- ◇ Minimize oil leakage of the machine
- ◇ Single/Tandem optional

Machine Controller

HD LCD display, with both Chinese and English language options, X, Y-axis intelligent positioning program. Control+converter via bus communication, ram and back gauge can be positioned fast and accurately. Easy operation with cost performance and high efficiency.

Torsion-Bar Structure

- High quality torsion-bar structure, shaft body adopts the traditional forging and tempering process, which has high strength, good elasticity and adjustable design.

Backgauge System

Establishing the right back gauge for your projects will allow for increased part production and precision. From intricate parts which typically require more axes to large quantities that require more time and therefore increased cost, the correct back gauge for each job is essential to lowering costs per part which ultimately benefits your bottom line. GENUO technicians are happy to assist you with any questions you may have on your project requirements.

2 Axis Back Gauge(X)

Tooling and Clamps

GENUO provides a variety of tooling solutions to meet your different production needs. Not only that, we are also experts in the field of bending tools. If you have any special bend, our engineers will customize special tools for each workpiece, which greatly expands your press brake function and revenue. To help greatly improve your productivity and business benefits.

Upgradeable GENUO One-Key Release Style Or Amada SGRIP Double-Sided Clamps

Hydraulic Valve and Motor

Siemens Motor

Rexroth Hydraulic Valve

Optional Configuration

Light Curtain Switch

The light curtain switch is applicable to some automatic factories to realize the regional management of machines.

Ensure that the machine is stopped when the operator checks and repairs the machine or appears in the wrong position. Improve safety.

Oil Fan Cooling Device

In some tropical areas or uninterrupted operation is required, oil cooling device can be configured to avoid overheating of hydraulic oil and ensure continuous normal operation of the machine

HTC Technical Specification

		A	B	D	E	C			
Model	Nominal Pressure	Length of Table	Distance Between Columns	Throat Depth	Open Height	Ram Strokes	Motor Power	Approx Weight	Overall Dimension
	(MPa)	(mm)	(mm)	(mm)	(mm)	(mm)	(kw)	(kg)	(L x W x H) (mm)
