

CNC Press Brake Electric Servo Hybrid Press Brake High Precision

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: genuo
- Minimum Order Quantity: 1
- Price: negotiable
- Packaging Details: carton box
- Payment Terms: L/C, T/T, D/P, D/A

Product Specification

- Product: Electric Servo Hybrid Press Brake
- Attributes: Two-way Servo High-precision Compensation, electric Front And Rear Feeding Device, self-circulating Oil Cooling, metal Sheet Cutting, thick Metal Sheet With High Speed And Accuracy
- Highlight: **Electric CNC Press Brake, CNC Press Brake High Precision, Servo hybrid press brake**

Product Description

The Electric Servo Hybrid Press Brake

The Electric Servo Hybrid Press Brake has two-way servo high-precision compensation, electric front and rear feeding device, self-circulating oil cooling and so on. The metal sheet to be cut is thick, and the requirements for speed and accuracy are also high. In contrast to the market, many manufacturers cannot meet these requirements. We are specialized in the production of CNC bending machines, CNC shears, CNC press brake and other metals. The press brake is developed by the company itself.

The main features of this press brake: whole steel plate welding, failure treatment, high strength; electro-hydraulic proportional servo synchronization, control at any point in the stroke; strong anti-deflection ability; backgauge adopts ball wire carrying and linear navigation, High repeat accuracy. In order to adapt to today's development, Ge Nuo provides more customers with the latest products through continuous research and development.
