

CNC Fiber Laser Cutting Machine 220V 380V 415V 440V High Precision

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: genuo
- Minimum Order Quantity: 1
- Price: negotiable
- Packaging Details: carton box
- Payment Terms: L/C, T/T, D/P, D/A

Product Specification

- Product_name: GN-LC Series Laser Cutting Machine
- Attributes: Small,high,easy,most Economical And Popular,GN-3015LC,normal Container Transportation,yes,yes
- Highlight: **CNC fiber laser cutting machine,
220V fiber laser cutting machine,
380V fiber laser machine**

Product Description

Laser Cutting Machine

Optional Models

GN-LC Single Table Series

GN-LC series laser cutting machine occupies a small area, high performance, easy to install. Is the most economical and popular series. GN-3015LC for export can be used for normal container transportation which can save you space and cost.

Features

The laser cutting machine adopts advanced laser of international famous brand, which has high electro-optical efficiency, water and energy saving. It is particularly important that it can be maintenance-free for a long time, saving a lot of maintenance money and time, and improving work efficiency.

Advanced Laser Generator

Standard configuration of stable and efficient Raycus or MAX laser generator.

Cutting Heads

All Genuo laser cutting machines are standard equipped with WXS or Raytools auto-focusing laser cutting heads.

Lightweight Crossbeam

The crossbeam is made of aviation grade aluminum, which is processed by extrusion molding process and heat aging process, which makes the whole machine rigid and has excellent surface quality and good toughness.

Stable and Solid Bed

The main body of the cutting machine is welded with high-quality carbon structural steel with tensile strength up to 500MPa. After high temperature annealing and natural aging to eliminate welding stress, deformation prevention, more durable.

High Precision Transmission Parts

Special Japanese SHIMPO or French Motovario flange reducer, precision rack and pinion, silent linear guide.

Electrical Components

The machine adopts Japanese Fuji or Panasonic servo motor and drive up to 6000r / min.

Powerful & Intelligent Laser Cutting System

The whole series of laser cutting machines are equipped with CypCut laser cutting control software or HypCut ultra-high power laser cutting control software.
