

High Power Laser Cutting Machine 120mm/Min 6KW 8KW 12KW 15KW 20KW Laser CNC Machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: genuo
- Minimum Order Quantity: 1
- Price: negotiable
- Packaging Details: carton box
- Payment Terms: L/C, T/T, D/P, D/A

Product Specification

- Product_name: GN-PC Series High Power Laser Cutting Machine
- Attributes: Enclosed, automatic Double Tables, greatly Saved, reduced Possible Harm To Human Body, closed, Array, machine Operation During Cutting
- Highlight: **120mm/Min Laser Cutting Machine,**
6KW Laser Cutting Machine,
20KW laser cnc machine

Product Description

GN-PC Exchange Table Series

GN-PC series high power laser cutting machine. The enclosed structure and automatic exchange of double tables greatly save the feeding time. Closed cutting also reduces the possible harm to human body caused by laser and smoke generated ,machine operation during cutting.

Features

The whole host adopts a gantry structure workbench. High damping bed, good rigidity, high precision and stable operation. The frame structure is made of high-quality steel honeycomb welding. The machine is annealed, second-aged and processed by a large gantry milling machine. These designs and processing methods ensure that the machine tool has excellent shock resistance, high rigidity and stability. The Fiber laser cutting machine fully meets the stability requirements of the machine tool in high-speed motion.

Advanced Laser Generator

It is an ideal laser source for laser fine cutting, precision welding and other applications.

Cutting Heads

The cutting heads have a built-in motor drive unit, which drives the focusing lens through a linear mechanism to change position automatically.

Lightweight Crossbeam

The lightweight and high rigidity of the crossbeam ensure the high-speed movement during laser processing. At the same time, it has perfect dynamic performance and meets the accuracy.

Stable and Solid Bed

Then by the large-scale precision gantry machining center for precision machining. Stable and reliable bed, no deformation, to ensure long-term cutting accuracy and machine stability. Optional casting machine bed.

High Precision Transmission Parts

With the automatic lubrication system, the maintenance of mechanical parts is greatly reduced. Optional Atlanta reducer, rack and pinion.

Electrical Components

At the same time, it has extremely accurate positioning accuracy and long service life. The main electrical accessories are Schneider and Siemens, reasonable line connection and optimization. Ensure a very low failure rate. Optional Yaskawa servo motor and drive

Powerful & Intelligent Laser Cutting System

With high accuracy visual positioning system and integrated CNC system successively. It is easy to use and has powerful functions, which can meet and apply to various processing occasions. Optional Germany PA8000, Siemens 840D CNC cutting system.
