

GNSP Series Press Brake Tooling Clamps GN Punch Holder

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: genuo
- Minimum Order Quantity: 1
- Price: negotiable
- Packaging Details: carton box
- Payment Terms: L/C, T/T, D/P, D/A

Product Specification

- Product Name: GN Punch Holder
- Feature 1: Reduces Press Brake Setup Times By More Than 50%
- Feature 2: Increases Operator Safety
- Feature 3: Compatible With European Style And AMADA's Latest One Touch Style Tooling
- Highlight: **GNSP press brake tooling clamps, press brake tooling clamps GNSP, GNSP press brake clamps**

Product Description

Products Description

We can supply various kinds of press brake tooling clamps. The mainly two types is normal type and fast type. We also can supply hydraulic clamps. In addition to the rapid clamping of the bending machine mold, it has the function of preventing the clamping or the mold and adjusting to uniform force or the mold.

GN Punch-Holder (Tooling clamp)

GENUO holds both European style tooling as well as AMADA's latest One Touch style tooling. GENUO GNSP standard fast support.

The patented rear butterfly pressing device can adapt to different types of European standard and Amada type punches. 42CrMo or C45 high frequency quenching process stamping brake tools for durability.

VERSATILE CLAMPING

The GN holds both standard European style punches and AMADA One Touch style punches allowing fast and easy tool setup. Slide in either tool and turn lever to secure punch.

GAPLESS SETUP

The internal adjustment wedge allows the faster punch holders to be located directly next to each other providing setup flexibility when using smaller sectionalized punches.

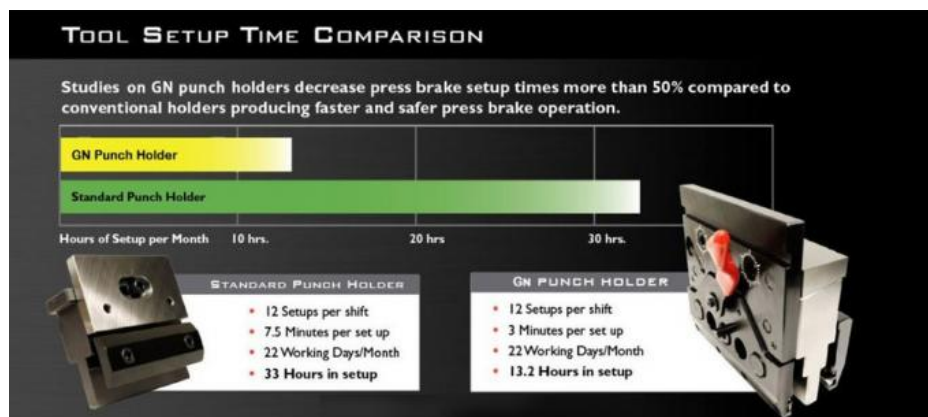

OPERATOR SAFETY

Drop prevention bar prevents punches from falling out of the punch holder during setup increasing operator safety. Once the punch is inserted into the clamp, the punch can be moved to any location along the brake bed eliminating the possibility of it falling out of the clamp.

SAFETY GROOVE

A special clamp plate is available which mounts the holder to the machine utilizing the safety groove on the top portion of the punch holder. This special clamp plate prevents holder from dropping when horizontal movement of clamp is required.

Products Configuration

Description	Tooling Clamp
Code#	GN15001
Tool Compatibility	Standard European/AMADA One-Touch
Machine Compatibility	Hydraulic Press Brakes
Holder Length 150mm	150mm
Effective Height 120mm	120mm
Allowable Tonnage	1000kN/m(100tons/m)
