

Electric Automatic CNC Press Brake Machine Hydraulic Sheet Metal Bending Machine

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: genuo
- Certification: M.2019.206.C3862
- Model Number: HTC-40T/63T/80T/100T
- Minimum Order Quantity: 1
- Price: negotiable
- Packaging Details: carton box
- Delivery Time: 90 days
- Payment Terms: L/C, T/T, D/P, D/A
- Supply Ability: 1 Set/Sets Every 15~35 days

Product Specification

- Product Name: Torsion-Bar NC Bending Machine
- Machine Application: Metal Sheet Mini Press Brake
- Machine CNC Controller: Estun E21/E300P
- Voltage: 220V/380V/415V/customized
- Product Color: Customization
- Hydraulic Valve: Rexroth
- After-sales Service: Online Technology Provider
- Main Advantage: Competitive Price
- Accessorial Service: Presented Two Years Warranty
- Degree Of Automation: Manual/ Semi-automatic
- Highlight: Automatic cnc press brake machine,
Electric cnc press brake machine,
220V hydraulic sheet metal bending machine

Product Description

High Quality Sheet Metal Electric Automatic CNC Press Brake Hydraulic Sheet Metal Bending Machine For Metal Process

→ Product Introduction:

GENUO SMART HTC series CNC press brake is an enduring classic metal sheet bending machine. The high-strength frame and simple torsion bar structure ensure the synchronization of both ends of the press brake and the smooth operation of the ram. The internal of the oil cylinder adopts the method of precise screw nut adjustment to realize the adjustment of bending angle. Advanced ball screw and linear guide roller back gauge are driven and positioned by servo motor. It can bring stable bending performance. High quality hydraulic system can burst out strong power and bending speed. Powerful well-known brand CNC controller can edit bending angle and positioning size. Multi part bending, avoidance and correction functions. Affordable price is a very good choice for normal bending workpieces. 30T ~ 400T optional.

→ Advantages of Genuo :

1. We are an ODM and OEM company that can produce machines according to the specifications, designs, and customer requirements of world-renowned brands.
2. Whatsmore, We have professional technology, advanced processing equipment, scientific quality management, continuously improving production capacity and creativity, which lay a solid foundation for the sustainable development of our company.
3. Our products have CE certification and SGS certification, and our factory has professional equipment testing and strict quality control.
4. For our customers, we can provide comprehensive customized and high-performance solutions to them, as well as great after-sales service, This is something that our competitors cannot meet.
5. The production process meets the highest standards to ensure exceptional quality and perfect detail. During the delivery period, we can customize high-performance solutions and timely after-sales service for you.
6. GENUO provides a variety of tooling solutions to meet your different production needs. Not only that, we are also experts in the field of bending tools. If you have any special bend, our engineers will customize special tools for each workpiece.

→ Product Configuration:

Standard Equipment:	Feature:
< CYBELEC CybTouch 8 CNC Control (X,Y axis)	< Easy bend programming and automatic back gauge
< Back gauge with precision linear guide and ball screw	< AC servo motor drive with colored graphics
< Ram via double cylinder mechanical positioning	< Angle input with auto adjustment of bending depth
< European-style punch and Multi-V/4V/2V Dies	< Adapt to sheet metal with different thickness
< Fast punch clamps and movable front support	< More efficient and variable bending
< SIEMENS main motor, Sunny pump, Rexroth Valve	< Powerful and durable bending power
< EMB ferrule type pipe connector, NO,K sealing rings	< Minimize oil leakage of the machine
< 40~400 Tons and 4~20ft Bending Lengths optional	< Single/Tandem optional

→ Machine Detail :

SMART HTC-PRO (WC67K) Series Press Brake

Machine Controller

● CYBELEC CybTouch 8

● Delem DA-41T/42T

Configuration & Selection

Backgauge System

Establishing the right back gauge for your projects will allow for increased part production and precision. From intricate parts which typically require more axes to large quantities that require more time and therefore increased cost, the correct back gauge for each job is essential to lowering costs per part which ultimately benefits your bottom line.

→ **After-sale guarantee :**

1. Free training Professional guidance and training to ensure the normal operation
2. Years WarrantySuper long-term warranty is our confidence in quality and commitment
3. Lifelong service Professional team to ensure that your machine is super long service.
