

High Precision CNC Tandem Press Brake for Bending Max Open 450mm

Our Product Introduction

for more products please visit us on genuocnc.com

Basic Information

- Place of Origin: M.2019.206.C3862
- Brand Name: GENUO
- Certification: China
- Model Number: ESC-40T/63T/80T/100T

Product Specification

- Valve: Bosch
- Material: Carbon Steel
- Ram Speed: 10 Mm/s
- Product: Press Brake Tooling
- Max Open: 450mm
- Coler: Customered
- Shaping Mode: Bending
- Bending Force: 40T~600T
- Highlight: **CNC tandem press brake,
450mm max open press brake,
high precision bending press brake**

Product Description

Product Description:

The CNC Press Brake is a versatile and powerful machine designed for precision bending of various materials. With a bending force ranging from 40T to 600T, this CNC Press Brake Machine is capable of handling a wide range of bending applications with ease and accuracy.

Equipped with a high-quality Bosch valve, this CNC Press Brake ensures smooth and reliable operation, delivering consistent results every time. The use of a Bosch valve also enhances the overall performance and efficiency of the machine, making it a reliable choice for industrial applications.

Designed for bending carbon steel materials, the CNC Press Brake Machine is perfect for shaping and forming metal sheets with precision and control. Whether you are working on large-scale production or intricate projects, this machine provides the flexibility and power needed to meet your bending requirements with ease.

The shaping mode of this CNC Press Brake is specifically tailored for bending applications, allowing you to achieve accurate and consistent bends with minimal effort. The machine's user-friendly interface and controls make it easy to operate, ensuring efficient workflow and productivity in your workshop.

Customized in color, this CNC Press Brake Machine can be customized to suit your specific preferences and branding requirements. With the ability to choose a color that reflects your company's identity, you can enhance the visual appeal of your workshop while also enjoying the functionality and performance of this advanced bending machine.

Features:

Product Name: Press Brake

Color: Customized

Product: Press Brake Tooling

Material: Carbon Steel

Bending Force: 40T~600T

Max Open: 450mm

Technical Parameters:

Bending Force	40T~600T
Valve	Bosch
Product	Press Brake Tooling
Max Open	450mm
Ram Speed	10 mm/s
Material	Carbon Steel
Color	Customized
Shaping Mode	Bending

Applications:

GENUO Press Brake is a versatile and reliable hydraulic press brake machine designed for a wide range of metal bending applications. With models available in ESC-40T, ESC-63T, ESC-80T, and ESC-100T, this CNC tandem press brake is suitable for various metalworking tasks.

Manufactured in M.2019.206.C3862, this press brake is certified in China, ensuring quality and performance. The shaping mode of the GENUO Press Brake is specifically for bending operations, making it ideal for fabricating metal sheets with precision and efficiency.

Featuring a ram speed of 10 mm/s and equipped with Bosch valves, the GENUO Press Brake offers high accuracy and control during the bending process. The maximum open of 450mm provides flexibility to handle different sizes of metal workpieces.

With its CNC hydraulic press brake capabilities, the GENUO Press Brake is suitable for various product application occasions and scenarios. It is perfect for metal fabrication workshops, manufacturing plants, automotive industries, and industrial maintenance facilities. Whether you need to bend sheet metal, plates, or structural components, the GENUO Press Brake Tooling ensures precise and consistent results. Its advanced features and reliable performance make it a preferred choice for professionals in the metalworking industry.
